

9 November 1960

Memorandum No. 3339

Dear John, 25X1X7

During [REDACTED] last visit here, he was quite interested in our Geographic Intelligence Memorandum series because the format seemed to have many of the characteristics needed for [REDACTED] briefing purposes. It is my understanding that he has used some of our ideas in the creation of his own Intelligence Briefing Memorandum. We of course would be very much interested in receiving copies of all of these IBM's, not only for content but also to see what the [REDACTED] have done with the format, the use of maps and text in a single briefing document.

My investigations have shown that we are not now receiving the IBM's in this organization. Perhaps you could make a special case with [REDACTED] to allow us to have a copy of one issuance if it proves impossible to get all that have been published.

Many thanks for your efforts in our behalf.

Sincerely,

25X1A9a
[REDACTED]
